

FIG. 1A

FIG. 1B

FIG. 2

Fig. 3

Birefringence (parallel - perpendicular) as a function of grating period. Grating fill ratio 50%. Calculation at 1.5 nm

Fig. 4

Absolute retardation as a function of grating depth. Wavelength 1.5 microns

FIG. 5

FIG. 6

650

FIG. 6A

FIG. 7

FIG. 8

FIG. 9

FIG. 10A

Different pixel orientation

FIG. 10B

Four different pixel orientations

FIG. 10C

General case – multiple “arbitrary” orientations of pixel configurations
